

Trey Chambers and Jacob Keith from Jefferson, Texas won 1st Place in the 1st Annual Lake Fork Open with a 2-day weight of 15.08-pounds winning them a \$6,000 Scholarship Package.

Lake Fork Open Scholarship Tournament

By Don Hampton

Seventy High School eligible teams showed up on Lake Fork at Oak Ridge Marina to participate in the 1st Annual Lake Fork Open High School Scholarship Tournament on July 26th and 27th. The registration, check in, and Captain's meeting was held on Friday July 25th. The tournament was open to all U.S. High School students enter-

ing 9th grade in 2014 and to those 2014 graduates who had not started college classes as of the date of the tournament. Students must be a member of

(See Lake Fork Open... Continued on Page 4-A)

Lew Conder (rt) was presented the Texas Trails Bassmasters of Lake Fork, Albert Jordan Memorial Trophy by Don Hampton and Debra Jordan. Each year in memory of Albert Jordan, who was a long time member that passed away last year, the angler earning the highest score at the end of the year two day championship will receive the trophy with his or her name engraved on it.

Dean McGuire fishing with brother-in-law Butch Cernosek from Fisherman's RV Camp caught a 10.31-lb. bass that measured 27" on a late July afternoon. The fish was officially weighed at Lake Fork Marina. C.P.R.

"Bubba's staying cool and has it made in the shade"

By: Don Hampton

Maybe it's the heat bearing down on Bubba's head from being in the sun too much or a phase in life he is going through but he has really impressed me with some of his ingenious ideas lately. Whichever the case Bubba has taken "Stuff" to a new level. July must have been Bubba's inventive month because he has come up with some ideas for fishing that would put Thomas Edison to shame.

It all started when Bubbette told him it was too hot to be fishing all day. Bubba doesn't like to hear anything that might slow up his fishing, especially coming from Bubbette. It was then that he applied himself to his drawing board and put his, "Nothin's gonna stop me from fishin' inventiveness," into motion.

These ideas weren't Bubba originals. I'm sure if he tried to market them there would be some patents brought to his attention, but for per-sonal use and homemade, he did real good.

The first thing Bubba did was get some PVC pipe and T's. With these he made an umbrella holder that would fit on his bass seat. This put store-bought ones, as he calls it, to shame. He had accomplished mobile shade so now what was he to do about the breeze. This problem he solved with the help of "Wally World". (That's Bubbette's name for Wal-Mart.)

Bubba bought one of those EverStart Maxx rechargeable jump starters. This is the type

that is a rechargeable DC 12-volt power supply. At first I had no idea how this would keep him cool until he pulled the other item out of his sack of goodies. Low and behold, Bubba had a 12 volt oscillating fan that plugs into a cigarette lighter outlet, with a clip that attaches to the umbrella. He informed Bubbette real quick that he now had his own portable shade and breeze and he was going fishing.

Bubba's power pack has two outlets. I can't imagine what he'll think of next to plug into the other outlet!!?? Bubba was now on a roll with his homemade creativity. He had seen one of his favorite pros on television using an ultimate drop-shot technique called a "Boomerang". His first thought was, "I can make one of those!" So, it was back to "Wally World" for some elastic, swivels, and snaps. It wasn't long before Bubba had every ball point pen in the house torn apart so he could use the case for his homemade version of the product. Sure enough Bubba's version worked great! So whenever he is around keep a close eye on your pens or they will wind up at the bottom of the lake tied to the end of his line.

His inventiveness did not stop here. Whenever Bubba is on the lake he doesn't like to stop and tie on new baits. That takes away from his fishing time. For his spinnerbaits he has solved this problem. On his favorites he has taken off the swivel connecting the blades and replaced it with a snap swivel. This way he carries extra blades in his pocket and if one doesn't work, he unsnaps it, replaces it with another in seconds and it is like using a different spinnerbait. To his way of thinking it changes one spinnerbait into as many blades as you have in your pocket. If you have five different types of blades in your pocket, you have six different spinnerbaits without having to tie and re-tie. To Bubba this also means he has a lot more stuff! Makes sense to me! Where Bubba comes up with some of his ideas, your guess is as good as mine! He even has a determent for getting sweat in his eyes when he is fishing. He did say, "I got this idea from an 'ole timer." (I wonder what he thinks he is?) To keep sweat from getting in his eyes while fishing Bubba always has on hand, a clear unscented stick of antiperspirant. He will dab it across his forehead and this keeps his forehead from sweating. This keeps the sweat from rolling down into his eyes. Just another thing Bubba doesn't have to worry about while fishing. He also said on this matter, "It ain't no good feelin' when you wipe the sweat from your eyes and you have sunscreen on your hands. That stuff stings like heck and you have to fish oneeyed!" Sounds strange but this is another piece of "Bubba wisdom" that sure enough works.

One thing is for sure with Bubba, if Bubbette lays down the law and won't let him buy any new stuff, he'll just make his old stuff into new stuff.

Lake Fork Open Scholarship Tournament (Continued from Page 1-A)

Mason Nivens and Nick Fincher from Grand Saline, Texas won 2nd Place with their 2 day weight of 12.43-lbs. winning a \$4,000 Scholarship Package.

Matthew Sprague and Cameron McAnally, from Wills Point, Texas won 3rd Place with their 2 day weight of 12.26-lbs. winning a \$2,000 Scholarship Package.

B.A.S.S. High School Nation, Student Angler Federation or show proof of membership in their high school independent fishing team program. If a student does not have a fishing program at their high school, they will need to show proof of being a student in good standing with the most current report card or letter from school officials. The majority of the teams were from Texas but Arkansas and Oklahoma were also represented. This was a 2-day

stringer tournament with each team being able to bring their best five bass to the weighin each day for an accumulated weight. There was \$15,000 in schol-

arship funds available for the top five winners plus sponsorship prizes going for places 6th through 14th. Teams were assigned flight numbers and given their times they had to be in the weigh-in line. Boat captains were responsible for the operation of the boat with the big motor and assuring that all safety equipment, boat registration, adequate storage for tackle, rods, and drinks, and all rules and regulations were adhered to by the anglers. Trailering was allowed but no boat could launch before 5 a.m. and the first cast was scheduled for 6 a.m. each day of the competition. (See Lake Fork Open... Continued on Page 13-A)

Jared Goebel and Austin White from Lumberton, Texas won 4th Place with their 2 day weight of 10.93-lbs. winning a \$1,000 Scholarship Package.

Braden Katchinska and Matt Reynolds from Sulphur Springs, Texas won 5th Place with their 2 day weight of 9.58-lbs. winning a \$500 Scholarship Package.

Look for August on the Fork to be different

By David Ozio

"I would love to have a crystal ball to peek into August and see how Lake Fork will set up this summer. This year of bazaar weather has dealt us curve ball after curve ball and a blizzard this month is not out of the question. Well, maybe it is. This recent cold front dropped the main lake water temp down to 79 but rebounded quickly to 85 within a couple of days. I did see 90 in one location recently. This inconsistency will keep the fish confused, and in my opinion, keep them from ganging up the way that they would normally do at this time of year. I still expect a lot of positives to come out of this chaos moving forward the rest of this year. If we can maintain 90 degrees for a peri-

od of time, look for schooling activity and a sizeable amount of fish to move up shallow around hydrilla. Oxygen in the water will be key as they relate to the water column that is most comfortable for their life style. As a rule, August is a great month for bass fishing and any period of stability will make these green fish more predictable.

With all this being said, let's set up a game plan for August. Personally, I haven't seen a great top water bite develop early but I have seen the bite improving on the outside edge of grass lines. Wacky worms, Texas rigs, lite Carolina rigs and drop shots will pick up their share of fish before 9:00am. Use dark colors early and switch to more translucent shades as the light increases. This means starting with a june bug color and moving towards plum as the hours pass by. The water is so clear around the grass and any sunshine will stop the bite a little earlier than we would like. An overcast day will buy you some extra time and a few more fish through mid-morning. At this point, if you are still catching them, don't leave. The old saying is, "don't leave fish to find fish". Don't be afraid to chunk a weightless shad imitation shallow as I have been seeing large groups of shad cruising the grass lines. If the bite has stopped completely, it's time to move on. Now it's time

to shift gear, move out deeper and bring on the Carolina rig. Main lake points should be the focus and target the 12-20ft depth ranges and if timber is present, all the better. Lots of colors work well deep and we all have our personal favorites. Watermelon candy red, plum, green pumpkin all will do the trick and you will need to experiment with action types to determine what the fish want. I prefer the brush hogs as an all-around bait but there are times when they want an 11 inch worm. If these don't produce, scale down to a fluke or even a straight tail worm. Sometimes, less is more. One of these combinations will bring home the

If you do not have a boat or just want to spend an enjoyable day on the lake fishing in someone else's boat - hire a guide!!! However, if you have invested thousands of dollars in a boat and equipment, or know someone who has, and want to spend enjoyable time on the water, call me!!! For a fraction of the cost of a guide trip, I will help you master your electronics to locate fish. I will help you learn the lake so you can find and catch fish with the fishing equipment you already have and <u>I will provide the lures</u>. I specialize in jig fishing for bass (and crappie). I instruct in all the new fish catching techniques as well as the basics. I look forward to hearing from you soon. Excellent fly fishing and outstanding bass fishing trips on Private Lake near Lake Fork. Call Roy Greer at 903-765-2075 or Write to P.O. Box 244, Alba, Tx. 75410-0244

If you are wondering where the crappie are, you need to first find the baitfish and target the depths that they are running. Start by checking the deeper areas of the lake - especially the main lake humps, points, and irregular bends in the main creek channels. Crappie like being where they have quick access to shallow and deep water so be sure and graph around dropoffs and ledges. Persistently monitor your depth finder and be sure to work the deep sides of these ledges and drop-offs where there is some form of structure or cover (stumps or brush piles). Right now the productive depths are ranging from 10 to 18 ft. in 20 to 30 ft. of water. Keep in mind—weather conditions and water clarity will all play a factor in how deep the baitfish will be – so in turn – how deep the crappie will be. So, pay close attention to your graph!!! Thank goodness for Lowrance and their amazing technology! They take the

guessing out of fishing! Now – when you're

not looking at your graph, pay very close attention to your line. These fish are on a very light bite so watch for your line to just go slack – if it does – JERK!! Nine times out of 10 I can see the bite before I feel it.

In open water and at the bridges, we're using double rigged jigs about a foot apart. Colors working for us have been cinnamon w/chartreuse tail, and gray w/black and gray tail. Then when fishing the brush and trees we switch to a single jig. This will allow you to fish tighter to the timber without hanging up as bad. We're using Gene Larew Slab Slayers in Electric Chicken or orange w/chartreuse on brighter days. Then on cloudier days I

like Caddo Morning or a dark shad color.

Now if you are still looking for bream, they have been holding in 1 to 4 ft. around the new moon and full moon. Otherwise they are backed off in 8 – 15 ft. around trees and brush, and the bridge ledges. Crickets or worms will work or if you don't like fooling with them, try Gulp minnows by Berkley.

I want to send a big thank you to all the parents and grandparents that took the time to bring all the kids out fishing this month. I don't know who enjoyed it more – the kids – or ME!!! Sure was fun! My best to you all and hope you find the time to get out on the water!

3rd Annual Hook N' Cook Sand Bass Tournament on Lake Fork

By Don Hampton

The "3rd Annual Hook and Cook Sand Bass Tournament was held on Lake Fork, July 19th, hosted by Bro's Patio and put on by directors of "The Wish to Fish Foundation". The tournament was directed mostly at showing everyone these fish, though a nuisance at times, are very tasty.

Matthew Symes caught the heaviest sand bass of the tournament and won 5th Place heavy stringer.

This was a great chance for all the complainers about the growing sand bass population in Lake Fork to come out and deplete those numbers. Judging from the number of participating anglers though, I feel some find it easier to sit back and complain than take active steps.

Participation for the tournament was lower than expected but those anglers that participated had a great time. Though competitive for cash prize the rules were more relaxed than most tournaments. Anglers could share informa-

Greg Morgan, member of Texas Trails Bassmasters of Lake Fork, had a nice limit of sandies and won 4th Place heavy stringer.

tion, tie up to each, use live bait and even fish with as many poles at one time as they desired.

Fishing hours for the tournament were 6 am to noon with a trailer in weigh-in behind Bro's Pation/Fisherman's One Stop on Hwy. 515. All anglers had to be in weigh-in line by 1 pm.

Though the tournament limit was five fish, all anglers were encouraged to bring in their daily limit of 25 to be filleted for the free fish fry to (Continued on Next Page)

Wrong species but good eating! Harold Jennings caught this nice 1.98-lb. crappie during the tournament and we ate it!

be held starting at 5 o'clock that evening. It was the responsibility of each angler to keep the five they wanted to weigh separate.

Some anglers were hard put at finding the schools of sandies, while others had a field day. Lew Conder from Point, Texas was one angler that had no problem. He won 1st Place heavy stringer with five sandies weighing 8.17-pounds and 3rd Place heavy sandie weighing 1.71-pounds. John Thorne won 2nd Place heavy stringer with five sandies weighing 7.46-pounds and had 2nd Place heavy sandie weighing 1.72-pounds. David Eldridge won 3rd Place heavy stringer with five sandies weighing 7.34-pounds. Greg Morgan won 4th Place heavy stringer with a five fish limit weighing 7.23-pounds. Matthew Symes won 5th Place heavy stringer weighing 5.96-pounds and 1st place heavy sandie weighing 1.87-pounds. Prize money for all the winners this year was paid in cash, no worries over check cashing. Following the prize presentations was the free fish fry of all the sandies that were brought in. It was an open invitation to anyone that wished to attend with donations accepted for "The Wish to Fish Foundation". Many remarked they had no idea these fish tasted so much like crappie and were so good! The fried fish were accompanied with baked beans, potato salad, hush puppies, cole slaw, ice tea,

and peach cobbler all prepared and donated by John Heimgartner, Bro's Patio and Fisherman's One Stop. (Except for the peach cobbler; Bubbette did that.) On behalf of the foundation, I and the other directors thank you and really appreciate all you've done for the organization. With the tournament, donations, and sale of raffle tickets the function raised \$575 for "The Wish to Fish Foundation". We would also like to take all of our other sponsors that gave so generously of product to put into the raffle. Plans for the 4th Annual Hook and Cook Sand Bass Tournament are in progress. It will be held in August,

2015. Watch for the date

and time in "The Fish-

Game Wardens Arrest 58 Intoxicated Boat Operators During the July Fourth Weekend

Texas Parks and Wildlife Department game wardens made 58 boating under the influence arrests and contacted some 30,000 recreational boaters over the July Fourth weekend.

Earlier, TPWD's Law Enforcement division participated in Operation Dry Water June 27-29 as part of a nationally coordinated boating under the influence (BUI) awareness and enforcement campaign. Game wardens continued their enhanced patrol efforts through the holiday as boaters enjoyed area waterways.

Over the three-day Operation Dry Water weekend, game wardens made contact with 22,732 recreational boaters, issued 1,147 citations and safety warnings and made 17 BUI arrests in an effort to raise awareness of the dangers of boating under the influence of drugs or alcohol. During the July Fourth holiday, game wardens made contact with roughly 30,000 recreational boaters and arrested 58 operators for boating under the influence. In addition, game wardens filed 39 minor in possession of alcohol cases and 8 drug related offenses.

"TPWD participates in coordinated efforts like Operation Dry Water, along with hundreds of other agencies nationwide, in an effort to reduce the number of accidents and fatalities we see due to boaters consuming alcohol on the water," says Asst. Commander Cody Jones, TPWD's boating law administrator. "Our goal is to educate boaters as well as remove impaired operators from the water in order to keep all other boaters safe."

Nationally, more than 550 local, state and federal law enforcement agencies from all 50

Wrong catch but great catch! I was fishing in a sand bass tournament when I caught this Lake Fork mammy feeding on them on July 19th. Don't think for a moment I'm complaining though. C.P.R. states and 6 U.S. territories participated in the 2014 Operation Dry Water effort. National results are still being collected and compiled, but in 2013, nationwide 6,219 law enforcement officers from 513 agencies and US Coast Guard units participated in Operation Dry Water. Officers made contact with 144,044 boaters, issues 17,159 citations and safety warning, and made 290 arrests for boating under the influence. Dry

Alcohol use is the leading contributing factor in recreational boater deaths. Since 2009, the year Operation Dry Water launched, there has been a 37 percent drop in the number of boater deaths where alcohol use was the known contributing factor, according to the 2013 U.S. Coast Guard Recreational Boating Statistics. For more information on Operation Dry Water, visit operationdrywater.org.

email: MinnowOne@aol.com web: www.minnowbucketmarina.com

by Brown, Winnsboro, Texas; Marshall White and Clay Lane, Terrell, Texas; Katlyn Stovall and Rhett Rabenaldt, Emory, Texas; Jarred Boutwell and Tyler Thames from Lumberton, Texas; Cody Benson and Collin Head, Combine, Texas; Bailey Mischnick and Tanner Clower, Mineola, Texas; and Avery Barrett and Hunter Smith, Forney, Texas.

As the weight master, I must congratulate all the anlgers and captains that participated in the tournament for their excellent handling of the bass. To my knowledge only two dead fish were brought to the scales during the course of the tournament. Also to the Lake Fork Sportsman's Association for their Live Release Boat a captain for either of

and their volunteers for getting all the bass back into the lake to be caught another day.

The many sponsors that came together to donate their time, monev and products are to be commended for their services. To date, fishing has become one of the fastest growing sports in America. What more positive path could we lead the youth of today down than faith, religion, and fishing? In our area alone our high schools are starting up their own or already have fishing teams that compete among themselves and other schools. Quitman and Mineola High Schools are starting theirs this year. If you or if you know anyone that would like to be

these schools, I urge you to get in touch with the appropriate officers. You should put your best foot forward to put our youth on the right path. Afterall the youth of today are the future of our industry. Steps and planning are already in motion for the 2nd Annual Lake Fork Open High School Scholarship Tournament to be held the last weekend of July, 2015. If you would like to be a sponsor or just a volunteer its never too early. You can contact Tracy Hatton at Oak Ridge Marina for further information.

"The Fisherman's Guide, News You Can Use"

Public Hunt Online System Now TPWD Drawing Live

Hunters applying for the Texas Parks and Wildlife Department's drawn public hunts can now take advantage of the new online-only Public Hunt Drawing System.

The new online-only system is currently accepting applications for 2014-15 Drawn Hunts, including Special Permit hunts. E-Postcard hunts. and U.S. Forest Service Antlerless Deer Permits. For the first time, the entire process is being handled electronically -- from applications, to fee payments and permit issuance. "Applications for Drawings on

Public Hunting Lands" booklets, application forms and permits will no longer be printed and mailed out. Hunt options can be browsed online by category or by area using an interactive map. A downloadable PDF of the 2014-15 Drawn Hunt Catalog is also available online. In addition to now being able to apply for multiple hunt areas within the same hunt category (i.e. apply for a Gun Deer -- Either Sex hunt on more than one hunt area), the online system will give applicants more time to apply. With no

paper applications to mail in, applicants will have until midnight CST on the day of the deadline to apply. Applicants will also retain and continue to accrue Preference Points, now called Loyalty Points, as in the past. Points will stay with the category and be applied to each application equally. And for the first applicants time, will be able to check the status of their applications and Loyalty Points online at any time.

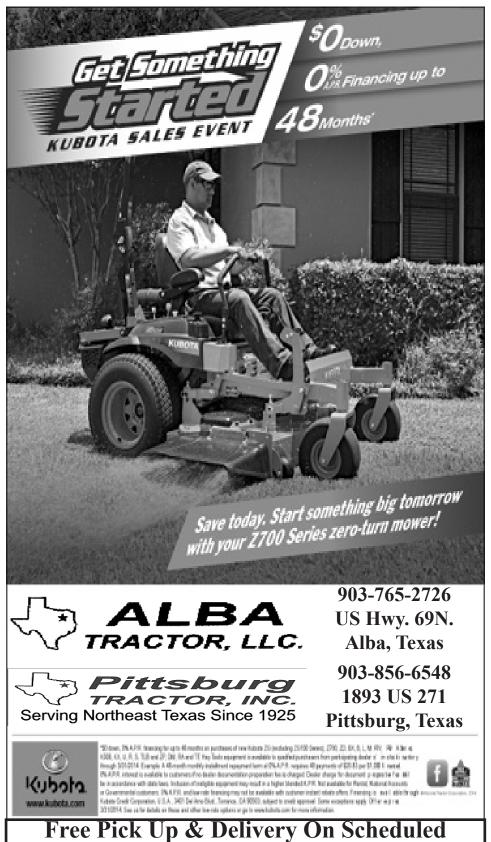

The new system will only allow applicants to submit complete and accurate applications. This will eliminate

tions. Once the submission and billing process is completed, orders cannot be canceled and fees cannot be refunded. All applicants (adults and youth) must have a Customer Account. Applicants that have previously applied for a drawn hunt or purchased a hunting or fishing license should already have an account. Those who do not have an account will need to create one before applying for a drawn hunt. A unique ID number is required to create an account. Unique ID numbers can be any of the following: State Driver's License Number, Social Security Number or Passport Number.

The Drawn Hunts Program offers affordable hunting experiences at more than 80 areas around the state in more than two dozen different hunt categories, including eight specifically for youth only. Adult application fees for Special Permit hunts are either \$3 or \$10 depending on the category. Adult hunters that are selected will also need to pay an additional permit fee of \$80 for regular hunts and \$130 for extended hunts. Some categories require no permit fee. There are no application fees or permit fees for youth age 8 to 16 and nonhunting supervising adults on youth only hunts. There are no application or permit fees for the E-Postcard hunts or the U.S. Forest Service Antlerless Deer permits. To participate applicants will need internet access, an email address, and a credit or debit card. Application deadlines start in August and wrap up in January. For more information about the new online system and to get started in the application process, visit http://www. tpwd.state.tx.us/drawnhunts. For guestions contact hunt@tpwd.texas.gov or call 512.389.4505 between 8 a.m. and disqualifica- 5 p.m. CST Monday through Friday.

Beat August Heat with a Canoe, Kayak Outing

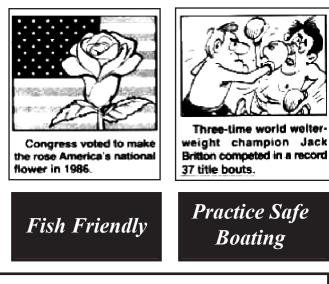

On the water it's easier than ever to experience a closer view of wildlife and scenery. Beat the heat and kayak or canoe easily accessible and scenic waterways in a state park or along a designated Texas Paddling Trail. More than 60 designated Texas Paddling Trails provide well-mapped, accessible day trips in a variety of settings and for all levels of paddling experience. Austin: Twelve Texas Paddling Trails within about an hour of Austin. They include: Lady Bird Lake Paddling Trail, El Camino Real Paddling Trail and Wilbarger Paddling Trail. Dallas/Ft. Worth: Eight Texas Paddling Trails within an hour of DFW. They include: Dallas Trinity Paddling Trail, Joe Pool Lake and Walnut Creek Paddling Trail (Grand Prairie), Lake Arlington Paddling Trail and River Legacy Parks Paddling Trail on the Trinity River (Arlington). Houston: Nine Texas Paddling Trails within an hour of Houston. They include: Buffalo Bayou Paddling Trail, Stephen F. Austin Paddling Trail, Galveston Island State Park Paddling Trail and Christmas Bay Paddling Trail. San Antonio: Seven Texas Paddling Trails within an hour of San Antonio. They include: Upper Guadalupe -- Nichol's Landing Paddling Trail (above Canyon Lake) and Saspamco Paddling Trail (near San Antonio) *Rio Grande Valley:* One Texas Paddling Trail within an hour of RGV: South Bay Paddling Trail

"Texas communities love this program, which has experienced great growth over the last year," says Shelly Plante, nature tourism manager for the Texas Parks and Wildlife Department. ThispastMay,Plantesays,threenewtrailswereadded near Victoria to the Texas Paddling Trails roster.

Many parts of Texas are experiencing drought conditions, so it's always a good idea to go online to consult specific river flow information (http://www.tpwd.state.tx.us/landwater/water/ habitats/rivers/flow/) in advance and to contact the Texas State Park you're planning to visit for current lake levels and other water conditions. Keep in mind that water levels at some state parks, such as Inks Lake and South Llano River, remain fairly constant despite ongoing drought. Paddling novices looking for helpful tips before heading out, can watch a how to paddle a canoe video or read a Canoeing and Kayaking 101 brochure. Paddlers should keep in mind that open bodies of water (lakes, rivers, bays, bayous, ponds, oceans) are vastly different from neighborhood swimming pools and definitely warrant extra precautions. The key differences are that there are no lifeguards,

water conditions can change rapidly and underwater currents sometimes exist. Bottom line: all paddlers should wear a life-jacket. In Texas, children under 13 in or on vessels under 26 feet must wear a U.S. Coast Guard approved wearable life jacket.

For trail maps and photos, where to rent canoes and kayaks, directions to access sites and fishing and wildlife information, visit: www.tpwd.texas.gov/paddlingtrails. For downloadable Texas paddling images, visit: http://www.tpwd.state.tx.us/newsmedia/news_images/?g=oam_paddling To view a YouTube paddling video, visit: http://youtu.be/H8SnpEG9MRI

Look for August on the Fork to be different (Continued from Page 6-A)

bacon and appeal to the current mood of the fish. As you approach midday, it's time to depend on your electronics. I like to think, if you can see them, you can catch them. Idle around on key structure in 20-35ft until the hooks appear and, if bait is present with the hooks, game on. Deep road beds, humps, extended points, pond dams and hard structure will all hold fish. You will need to burn some gas to find where a large group of fish might be holding. Once located, Carolina rigs, flutter spoons, tail kickers, crankbaits, A-rigs and the beloved drop shot will be the weapons of

choice. Chrome spoons will be a great choice as well as shad colored crankbaits especially if the green monsters are suspended. This will be obvious as you idle over the structure and you will see them anywhere from 10-20ft down hovering over 30 plus feet of water. Also consider using a weightless fluke for these fish as they are the toughest to catch. Experiment with the countdown method to target the depth level where you have spotted the fish. If you happen to idle over a brush pile, mark it with a way-point and turn around and fish it with a Texas rig worm or a jig. I have seen giants come off this type of structure before. Fish are where they are and it's our job to find them.

If you are headed out to Lake Fork in August searching for the trophy of a lifetime, I would love to be a part of this trophy quest. I still have a few dates in August. I also have gift certificates available if you have friends or loved one's who have dreamt of landing a huge bass. You can contact me at 409 782-4269 or e-mail me at skeet21c@aol.com. You can follow me on Facebook at https://www.facebook.com/LakeFork-GuideDavidOzio. I run a Skeeter FX with a Yamaha 250SHO and would like to thank Skeeter for making my office on the lake the best in the country. I would also like to thank G-Loomis, Shimano and Lowrance for making my job the blast that it is. A special shout out to H&W Marine in Tyler for all their help in keeping me on the water seven days a week, no issues. I hope to see a lot of you on the water. Romans 10:13. "Everyone who calls upon the name of the Lord shall be saved". I wish all of you a blessed day."

Texas Game Wardens Host National Officer Water Survival "Train the Trainers" Course

Texas Parks and Wildlife Department game wardens recently hosted a nationwide Train the Trainer Officer Water Survival (OWS) course for water safety enforcement officer trainers. Officers from Texas, Guam, Northern Mariana Islands, Alaska, New Mexico and Arizona attended the course which took place July 21-25 at the School for the Deaf pool facility. This training is part of the National Association

of State Boating Law Administrators (NASB-LA) Boat Operations and Training (BOAT) Program catalog of nationally credentialed courses. "Texas game wardens like many of their counterparts from across the nation are the primary law enforcement officers on the state's waters, an environment which brings its own hazards," said Asst. Commander Cody Jones, Texas' Boating Law Administrator. "In the course of their duty, game wardens wear gear including their duty belt and ballistics vest that add an additional 18 to 20 pounds of weight to them. It's important that if they enter the water whether expectedly or unexpectedly they know their capabilities and how to survive." "Six Texas Game Wardens have drowned in the line of duty and that's something we think about every day," said Colonel Craig Hunter, TPWD Director of Law Enforcement. "Game wardens are routinely on the water in very demanding situations and this training will save lives." Eighteen officers from across the nation went through this five-day course, which included skills in surviving a water entry in uniform, disengaging from an assailant while in the water, water extraction techniques, and other lifesaving water skills.

Gulf of Mexico Shrimp Season Opened July 15

The Gulf of Mexico commercial shrimp season for both state and federal waters opened July 15. The opening date is based on an evaluation of the biological, social and economic information to maximize the benefits to the industry and the public. In making its determination, the Texas Parks and Wildlife Department Coastal Fisheries Division used the best available scientific information including samples collected by using trawls and bag seines in TPWD routine data collection.

The purpose of the closed Gulf season is to protect brown shrimp during their major period of emigration from the bays to the Gulf of Mexico until they reach a larger, more valuable size before harvest and to prevent waste caused by the discarding of smaller individuals. Federal waters (from 9 to 200 nautical miles offshore) opened at the same time that state waters opened. The National Marine Fisheries Service chose to adopt rules compatible with those adopted by Texas.
